PRODUCT BENEFITS

1 COMPARISON MATRIX

	Ordinary Glass	Nano Coat Anti-heat Solution
Solar Heat Gain Coefficient (SHGC)	0.86	0.61
Ultraviolet (UV) Deflection	30%	86%
Visible Light Transmission (VLT)	85%	76%
Glare Reduction	28%	48%

2 TEMPERATURE & GLARE TEST

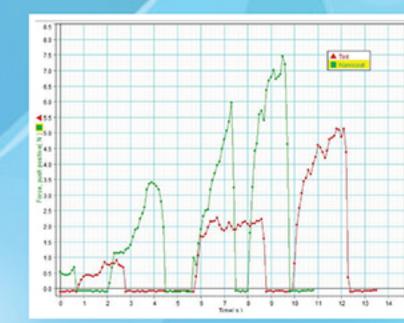

Nano Coat exhibits a significant drop in temperature (27.3 °C) compared to other samples

4 HEAT REJECTION COMPARISON

3 HARDNESS TEST

Nano Coat takes more abrasion force (7.5 N) to delaminate from the glass panel than tint (5.1 N)

5 SAFETY TEST

Analytes	mg/L	Analytical Methods
Chromium	ND*	Ashing-Acid Digestion/Inductively Coupled Plasma Spectrometry
Lead	ND*	
Cadmium	ND*	
Mercury	ND*	Acid Digestion/Cold Vapor Atomic Absorption Spectrophotometry

Nano Coat tests negative for harmful chemicals

6 APPLICATION TECHNIQUES

- Curtain Painting
- Squeegee
- Rolling Technique
- Dipping

Nano Coat is a clear glass coating that is applied to new and existing glass panels to block the sun's heat and UV rays from entering. Developed from sol-gel and nano technologies, Nano Coat is designed for maximum effectivity without compromising visibility. This water-based solution is safe for use anywhere from residential to commercial and industrial applications.

Nano Coat is here for your improved comfort, added protection, and energy savings.

COMFORT

Experience indoors,

- A cooler environment prevents exhaustion, allowing you to be more productive
- Prevents heat related conditions like dehydration and heat stroke
- Unobstructed windows mean a brighter room with a better view

PROTECTION

Block 86% of UV rays from reaching you

Color fading shown on the same packaging due to UV ray exposure

- Prevents fading of your products and furniture
- Protects your body from harmful UV rays which ages skin and causes skin disease
- Helps keep your glass free from microbes

SAVINGS

Save 667.8kWh of power a month*

Accumulated savings of P135,000 during a 9-month period

- Reduces the power that your air-conditioner needs to keep your room cool
- Lessens your use of artificial light during the day

*based on NASA insolation data of 5.22 kWh/m²/day and a glass area of 50m²

FEATURES

WHY USE NANO COAT OVER TINT

CLEAR

Maintains 76% visible light transmission and reduces glare by 48%

SAFE

Odorless, water-based solution with no harmful chemicals or volatile organic compounds (VOC)

ANTI-MICROBIAL

Keeps your glass free from bacteria but stays safe for people

VERSATILE APPLICATION

Can be used for skylights, canopies, curved glass, and polycarbonate sheets

SEAMLESS FINISH

No joints on your large glass panels unlike with film

10-YEAR LIFESPAN

Lasts for ten years without bubbling or delamination

EASY TO MAINTAIN

Cleans with water and soap; no glass cleaners or chemicals needed

PROFESSIONAL TEAM

Senior applicators with regional and international experience
